**Subject:** Re: Response Needed - Sheep Clean Up Project

Hey All,

Good evening.

We set up the fences, water supply, signs, and placed the sheep on the inner berm today. We brought a LOT of mamas and babies thinking the residents might like that for the holiday season. If it is possible, please post this in your weekly email blast:

*The sheep continue to work on the dam and creek ledge. Contractors will start coppicing the alder trees and removing more invasive trees and shrubs from the dam bank on Monday, April 8, weather permitting. All debris will be chipped to the bank and spread evenly.*

*Other sheep have also started working on the inner berm area. They will be there for the next several weeks.*

*Please continue to be patient while we prepare these areas for return to public use with a goal of May 1st.*

And remember, text the shepherd first if you have any concerns or questions.

Peace to you all.

John
